

**1. Does the Board of Directors receive compensation?**

Board Members do not receive compensation in any form.

**2. What is a “main line” water leak?**

The \$5 credit is given to the first meter owner to report a "main line" water leak. A main line water leak is a leak that occurs on the corporate/Frognot WSC side of the water meter. A main line water leak includes a leak located under and up to the meter itself. There is no credit given for reporting a leak located on your side.

However, any leak is a waste of water so if you are in doubt, please call. We will help determine the leak location so that it can be repaired -- saving water and money for all of us.
